## The Fed Did NOT Cut Mortgage Rates, But Trump Tried!

On the morning after this week's Fed rate cut, mortgage rates were roughly unchanged versus the previous morning. This will come as a **surprise** to scores of consumers who mistakenly believe the Fed's 0.25% rate cut equates to a 0.25% drop in ALL rates.

The Fed **only** sets its **own** "Fed Funds Rate" which governs overnight lending between big banks. The only direct effect on the mortgage market would be a 0.25% drop in many Home Equity Lines of Credit (HELOCs), which are based on the Fed's rate. The vast majority of mortgages, however, are determined by **other** parts of the financial market.

In fact, mortgages actually "turn into" securities that are traded in financial markets as a part of the process that makes them safer and easier for investors to buy (securitization). Those securities trade just like other securities, for the most part (e.g. stocks, bonds, etc.), and it's the price movement of **those** securities that most directly dictates mortgage rates. **Shockingly** enough, these are known as Mortgage-Backed Securities (MBS).

**Unlike** the Fed Funds Rate, which can only change once every 6 weeks, longer-term rate-bearing securities (like MBS and US Treasuries) can change **every minute** of every business day. They've been doing just that for months as market anticipation for the Fed rate cut has increased. Simply put, the Fed rate cut has long since had its impact on mortgage rates. After all, if a security can move in real time, and if the market was 100% sure the Fed was going to cut at least 0.25%, traders would have been foolish NOT to get in position.

This isn't a unique occurrence. Rates ALWAYS get in position for Fed rate cuts/hikes like this week's because the Fed is sure to telegraph its intention when it's making the first big change in a long time (this was the first rate cut since 2008!). In late 2015, when the Fed hiked rates for the first time since 2006, it was the same story, but in the opposite direction.

## National Average Mortgage Rates

	Rate	Change	Points
<b>Mortgage News Daily</b>			
30 Yr. Fixed	6.89%	0.00	0.00
15 Yr. Fixed	6.33%	+0.01	0.00
30 Yr. FHA	6.33%	+0.01	0.00
30 Yr. Jumbo	7.05%	0.00	0.00
5/1 ARM	6.58%	0.00	0.00

### Freddie Mac

30 Yr. Fixed	6.77%	-0.09	0.00
15 Yr. Fixed	6.05%	-0.11	0.00

Rates as of: 7/22

## Market Data

	Price / Yield	Change
MBS UMBS 5.5	99.39	-0.01
MBS GNMA 5.5	99.78	+0.00
10 YR Treasury	4.2530	+0.0005
30 YR Treasury	4.4720	-0.0005

Pricing as of: 7/23 2:56AM EST

## Recent Housing Data

		Value	Change
Mortgage Apps	Jul 10	206.1	-0.19%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Rates Move Before Fed

To emphasize the point in even simpler terms, consider that stocks **LOST** ground after the Fed announcement, even though Fed rate cuts are considered to be a good thing for stocks. Like mortgage rates, stocks already had plenty of time to **PRICE-IN** the Fed's move. That left Wednesday for them to react to other information from the Fed. Specifically, they were a bit disappointed that Powell didn't do more to offer assurances about additional cuts. That's why we saw the lion's share of market movement after Powell's press conference at 2:30pm ET as opposed to the rate announcement at 2pm ET.

S&P Futures

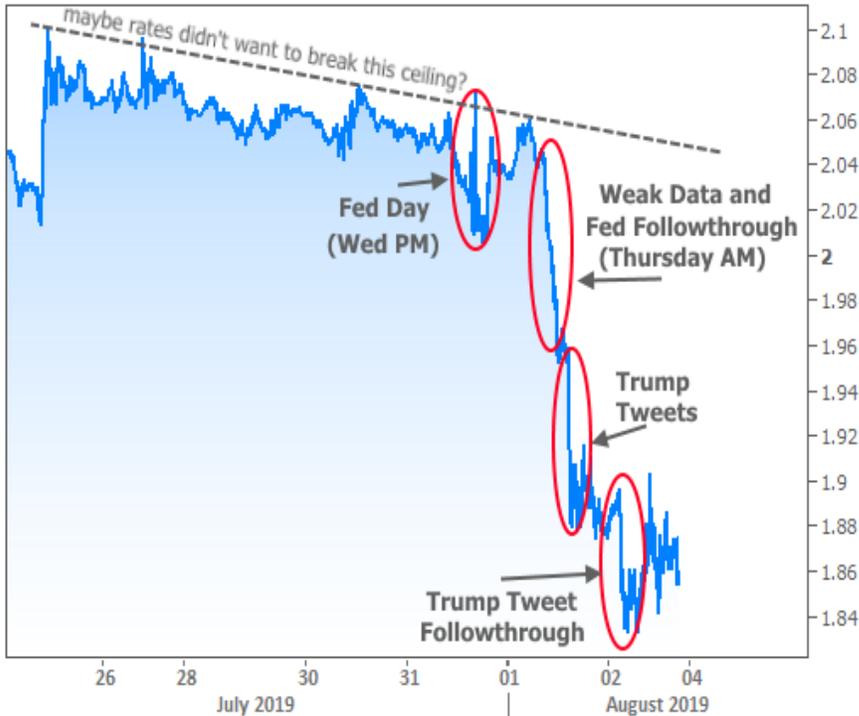

That means, all other things being equal, if the Fed were to say "we're done cutting for now and will keep rates at these levels for the next 6 months," you'd see an **immediate and rather large** move **higher** in rates. In other words, markets were already counting on another 1-2 Fed rate cuts simply to sustain the low rates that are **already** here. By the end of the week, however, speculators were betting on another 2-3 cuts! What's up with that?

### 3 words: Trump Tariff Tweets.

As we've seen on numerous occasions in 2019, when Trump unexpectedly announces new tariffs on China (or Mexico) via Twitter, markets react in a major way. Timing was a factor this week as the tweets followed a Manufacturing report that was gloomy enough **without** another batch of tariffs to worry about. Trading positions are also more susceptible to surprises on the day after a Fed day. Regardless, every escalation of trade war rhetoric increases the odds that the Fed will need to cut rates deeper to promote continued economic expansion.

10yr Treasury Yield

If that looks like a fairly significant drop in rates, **it is!** The following chart does a better job conveying the size. Each "candlestick" represents a week of trading in 10yr Treasury yields (the benchmark for longer-term rates, such as mortgages). Orange candlesticks mean rates moved higher; blue = lower. For the record, **you'd have to go back to 2012** to see a week where rates fell farther!

10yr Treasury Yield

Low rates don't singlehandedly prop up the housing market, but they definitely help. That was part of the rationale in last week's newsletter which pushed back on recent news headlines calling the **health of the housing market** into question (revisit it [HERE](#) if you like). Now this week, we have the most recent Pending Home Sales report, which is an advance indicator of Existing Home Sales--by far the biggest component of the housing market. I'll let the chart do most of the talking. Let's just say, if you're a regular reader of my newsletters, this is exactly how this summer was supposed to go.

Pending Home Sales

## Who is Mid Valley Financial?

Mid Valley Financial, located in Fresno, CA, is the Central Valley’s premier destination for a wide range of residential and commercial real estate loans. Our commitment to excellence has made us a trusted partner for property buyers and investors seeking tailored financial solutions.

### **\*\*Why Choose Us:\*\***

With a track record spanning back to our inception in 1985, we have established ourselves as a reliable and innovative lender. We proudly serve properties exclusively within California, having funded loans in all 58 counties of the state. Our deep-rooted experience enables us to navigate complex loan scenarios with expertise and efficiency.

### **\*\*Our Approach:\*\***

At Mid Valley Financial, we prioritize your financial goals. Whether you're a first-time homebuyer, envisioning your dream property, refinancing an existing mortgage, or looking to tap into your property's equity, our seasoned loan officers offer a wealth of knowledge and over 300 years of collective experience. We ensure that your funds are prepared when you need them, providing a smooth and swift loan process.

### **\*\*Unlocking Possibilities:\*\***

As one of California’s leading direct lenders, we've streamlined the loan process, minimizing obstacles that often deter borrowers. Many of our clients receive approvals within an hour, showcasing our dedication to quick and hassle-free solutions.

### **\*\*Your Journey with Us:\*\***

Contact the MVF team today and let us put your journey to property ownership on cruise control. Our mission is to empower borrowers while fostering enduring and meaningful relationships. With highly competitive rates, a commitment to transparency, and a dedication to your financial success, Mid Valley Financial is your partner in realizing your real estate aspirations.
