## Best Month in a Decade For Mortgage Rates!

Since February 28th, the average mortgage rate quote for the average lender dropped by roughly half a percentage point. That makes March 2019 the **best month for rates** since the Fed first announced quantitative easing (the bond buying program that targeted mortgage rates) in late 2008.

It's no small coincidence that Fed bond buying was responsible for the big move in 2008 (and 2011 for that matter). I've not been shy about [pointing out](#) that last week's Fed decision was functionally equivalent to announcing **another bond buying program**. Such programs are rising tides that lift all boats. Case in point: stocks and rates improved simultaneously (seen as the orange and blue lines moving apart on the following chart) when the Fed first hinted at the change on January 30th. Last week brought more of the same although the benefits were mostly reserved for rates.

## National Average Mortgage Rates

	Rate	Change	Points
<b>Mortgage News Daily</b>			
30 Yr. Fixed	6.89%	0.00	0.00
15 Yr. Fixed	6.33%	+0.01	0.00
30 Yr. FHA	6.33%	+0.01	0.00
30 Yr. Jumbo	7.05%	0.00	0.00
5/1 ARM	6.58%	0.00	0.00
<b>Freddie Mac</b>			
30 Yr. Fixed	6.77%	-0.09	0.00
15 Yr. Fixed	6.05%	-0.11	0.00

Rates as of: 7/22

## Market Data

	Price / Yield	Change
MBS UMBS 5.5	99.39	-0.01
MBS GNMA 5.5	99.78	+0.00
10 YR Treasury	4.2403	-0.0122
30 YR Treasury	4.4612	-0.0113

Pricing as of: 7/23 4:47AM EST

## Recent Housing Data

		Value	Change
Mortgage Apps	Jul 10	206.1	-0.19%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Rates vs Stocks

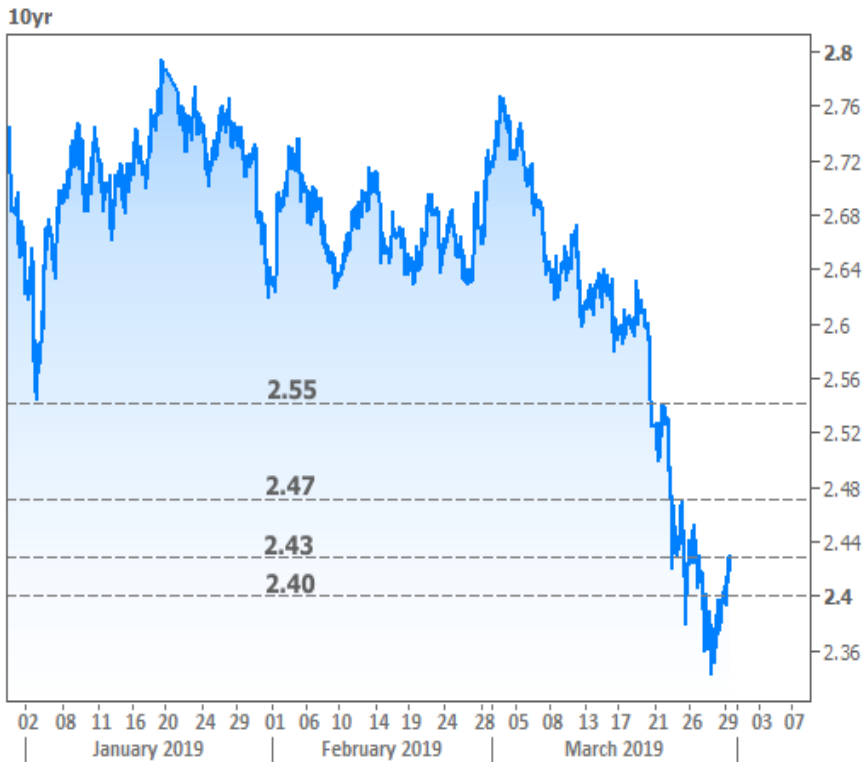

But that was last week's news, and indeed, most of the bond market movement responsible for the drop in rates occurred last week. Since then, things have evened out a bit for both stocks and bonds.

Rates vs Stocks

The Fed news has largely been priced-in and markets are turning their attention to other indicators. Economic data will be increasingly important as it will ultimately decide if the Fed is **justified** in its friendly policy shift. Reason being: the Fed cited growth concerns last week, and economic data is all about measuring growth!

As markets wait to see what upcoming economic reports suggest, there are **several important ceilings** and inflection points we can watch in rates. It's easier to do this with 10yr Treasury yields, even if our main concern is mortgage rates. In 10yr terms, rates have convincingly broken below 2.55% and 2.47%. They're now fighting to break under 2.40%.

Why should we care if 10yr yields can stay near or under 2.40%? It could turn out to be nothing this time around, but past precedent suggests 2.40% as an important inflection point (meaning rates have **almost always bounced** there, or moved through forcefully). The only time they came close to lingering was in 2017, but even then, there was more of the same "inflection point behavior" on a smaller scale.

More simply put, assuming the precedent holds, if rates can break below 2.40%, they **should keep moving lower** (as they did in 2011 and 2014). If they bounce, it's not the end of the world. A bounce could actually make the subsequent move more sustainable as long as they stay under 2.55%.

**Why should we care** if rates move lower? Do we even need to ask? Rates are certainly not the only factor driving home sales and prices, but they are a huge factor. Any time homebuying is made significantly more affordable (either by lower prices, lower rates, or even tax credits), the market responds.

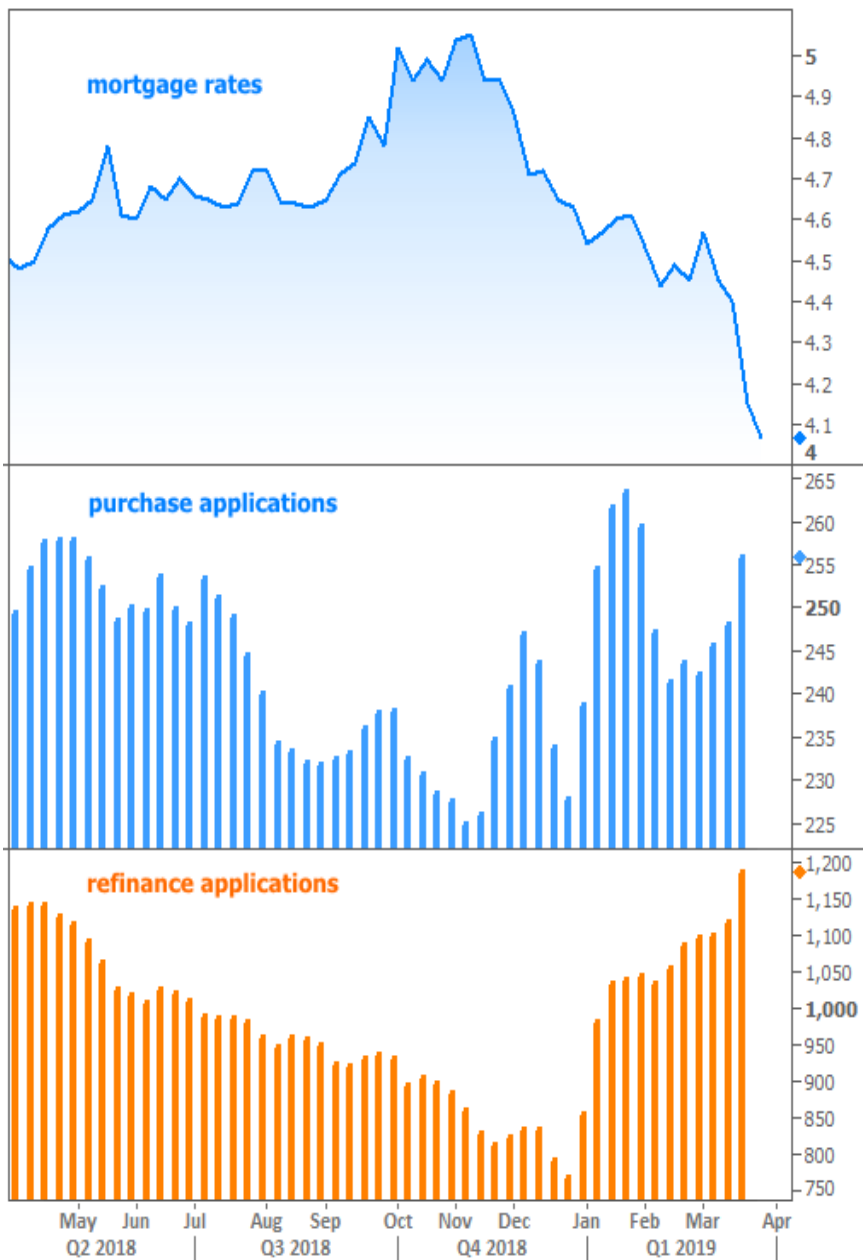

Pending and New Home Sales both reported this week, and both continued to show **resilience** after the 2018 slump. A big rate spike was a key ingredient in that slump, and the big drop in rates is helping reverse the home sales trends ([as we discussed 6 weeks ago](#)).

Elsewhere in the housing data sphere, home price reports, which run a month behind the sales reports, are giving **mixed signals**. Case-Shiller data indicates slower price growth in January while FHFA's price index increased 0.6% compared to December's 0.3% gain. This **isn't** necessarily troubling because prices tend to be slower to respond to changes in interest rates. In any event, both indices continue to operate safely in positive territory.

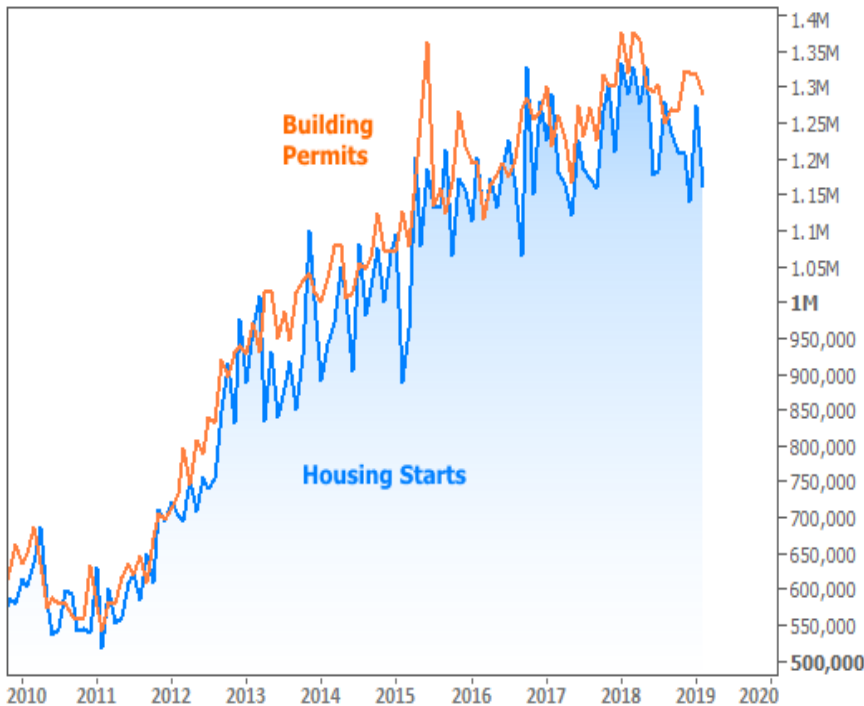

On the other end of the spectrum with respect to lag time, mortgage applications (both purchase and refi) immediately **surged** as rates hit new long-term lows.

Last and least (at least among these peers), New Residential Construction contracted a bit in February. The move was more pronounced in terms of housing starts (the first phase of construction), which are typically **more volatile** compared to the mere filing of building permits. This data series isn't of tremendous interest because it's been much steadier than the sales-

related reports.

If financial markets are going to make big decisions based on economic data, next week could be interesting. 4 out of 5 days have significant reports with Retail Sales and ISM Manufacturing leading things off on Monday. ADP Employment and ISM Manufacturing make Wednesday a candidate for volatility as well, but **Friday trumps all** with the mighty jobs report. The payroll count (part of the jobs report) will be especially interesting following last month's shockingly low 20k. The current consensus is for 170k.

## Who is Mid Valley Financial?

Mid Valley Financial, located in Fresno, CA, is the Central Valley's premier destination for a wide range of residential and commercial real estate loans. Our commitment to excellence has made us a trusted partner for property buyers and investors seeking tailored financial solutions.

### **\*\*Why Choose Us:\*\***

With a track record spanning back to our inception in 1985, we have established ourselves as a reliable and innovative lender. We proudly serve properties exclusively within California, having funded loans in all 58 counties of the state. Our deep-rooted experience enables us to navigate complex loan scenarios with expertise and efficiency.

### **\*\*Our Approach:\*\***

At Mid Valley Financial, we prioritize your financial goals. Whether you're a first-time homebuyer, envisioning your dream property, refinancing an existing mortgage, or looking to tap into your property's equity, our seasoned loan officers offer a wealth of knowledge and over 300 years of collective experience. We ensure that your funds are prepared when you need them, providing a smooth and swift loan process.

### **\*\*Unlocking Possibilities:\*\***

As one of California's leading direct lenders, we've streamlined the loan process, minimizing obstacles that often deter borrowers. Many of our clients receive approvals within an hour, showcasing our dedication to quick and hassle-free solutions.

### **\*\*Your Journey with Us:\*\***

Contact the MVF team today and let us put your journey to property ownership on cruise control. Our mission is to empower borrowers while fostering enduring and meaningful relationships. With highly competitive rates, a commitment to transparency, and a dedication to your financial success, Mid Valley Financial is your partner in realizing your real estate aspirations.
